

Exercise 3.8

Sphere completion times

Isotonic position control mapping	mouse	3,35s
Isotonic rate control	mouse	14s
Isotonic acceleration control	mouse	We could not complete this task
target based control	mouse	10s
elastic position control mapping	space navigator	13,63s
elastic rate control	space navigator	30s
elastic acceleration control	space navigator	30s

Suitable

Not Suitable

Fastest

The ones that we found suitable are those that we managed to complete within a reasonable amount of time, under 1 minute. The isotonic acceleration control was unreasonable as we were unable to finish it or even control the bird properly. We found those that took less than 15 seconds to be the fast and easy control tasks and the remaining two elastic rate control and elastic acceleration control tasks to be a little more challenging.
